

Enterprise Hosting Infrastructure as a Service (IaaS)

Dedicated Hosting

House Your Asset at Where You Can Count On

Overview

NTT Com Asia's Dedicated Hosting in our Infrastructure as a Service (IaaS) series is a highly available, scalable and flexible service that offers our premium IT infrastructure on a subscription model.

NTT Com Asia provides a full range of dedicated devices hosting including:

Dedicated Server

- Providing dedicated server hosting and server OS that enables customers to house applications and data

Dedicated Firewall

- Providing rental firewall devices to protect our customers' network from unauthorised access and to keep it secure and policy-compliant

Dedicated Unified Threat Management (UTM)

- Providing comprehensive threat management solution service, which protects the company's network against application and network threats, as a complement to existing solutions or as an all-in-one security gateway

Dedicated WAN Performance Acceleration (WPA)

- Assisting in the acceleration of application and network performance across WAN by using WAN Optimisation Controllers, and through the fine-tuning of protocols and prioritisation of throughput improvement; without changing the current network setup

Dedicated Load Balancer

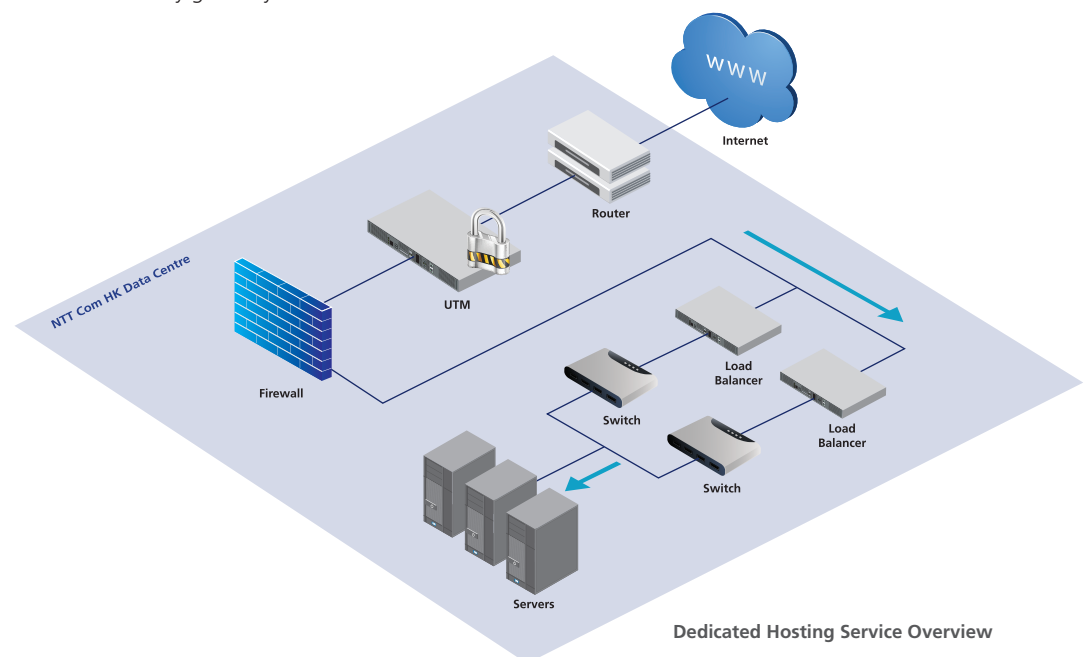

- Providing managed server load balancing service that distributes workload across multiple servers

Dedicated Switch

- Providing rental network to ensure LAN performance, reliability and security

Dedicated Router

- Providing rental network routers that manage network routing
